### **Statement Regarding CMS's Proposed GLOBE Price Controls Rule**

The following statement on the finalized GLOBE drug price controls rule may be attributed to James Edwards, Executive Director, Conservatives for Property Rights:

"The 'Global Benchmark for Efficient Drug Pricing' rule the Centers for Medicare and Medicaid Services has issued may be somewhat less sweeping and somewhat resemble a model test, but the fact remains that GLOBE employs drug price controls for Medicare Part B pharmaceuticals.

"Its importation of foreign social democracies' government-dictated prices is still anathema to any thinking American who values earlier access by a year or more to more new medicines and other tangible benefits of the R&D pipeline that characterizes U.S. biopharma innovation.

"Socialistic price control policies—the GLOBE 'most favored nation' model or otherwise—don't belong in U.S. health policy. Moving forward with MFN government price controls threatens vital American innovation and economic freedom. GLOBE embraces and extends the tentacles of destructive policies much as the Biden-era Inflation Reduction Act's price controls are doing."
